PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of hands-on experience designing and shipping production-grade web applications. Specialises in React, Next.js, and TypeScript on the frontend, with solid backend skills spanning RESTful API design, PostgreSQL, authentication systems, and cloud deployment. Proven track record delivering polished, accessible UIs and scalable data pipelines — from real-time crypto dashboards to AI-powered SaaS platforms — while collaborating effectively in remote, Agile environments.

EXPERIENCE

Full-Stack Developer · Rheingold

2025 – Present | Remote

CashCognizance — Cryptocurrency Analytics Platform

- Architected and deployed a full-stack crypto analytics platform serving real-time market data, automated reporting, and AI-powered content generation to retail investors.
- Built a Next.js 16 / TypeScript application with SSR, 25+ RESTful API endpoints, and PostgreSQL for user management, newsletters, and analytics tracking.
- Engineered automated PDF report generation (React-PDF + Vercel Blob), providing secure access to 30+ historical reports with dynamic chart rendering.
- Implemented NextAuth v4 authentication with RBAC, bcrypt hashing, and middleware-protected admin routes.
- Built an AI-powered tweet engine generating market analysis copy and sentiment-styled SVG brand images.
- Integrated CoinGecko API for live price tracking across 50+ assets; built Recharts dashboards for page views, user engagement, and traffic-source analytics.
- Shipped end-to-end newsletter infrastructure (Resend API, double opt-in, admin delivery dashboard) and Web3 wallet integration scaffolding (ethers.js, @solana/web3.js, WalletConnect).

ShotGen — AI Video Generator Platform (Frontend)

- Developed the complete frontend for a SaaS AI video platform, supporting text-to-video and image-to-video workflows with real-time status polling and progress tracking.
- Engineered a multi-step content creation interface with file upload (10 MB, jpg/png/webp), style presets (Cinematic, Promo, Social, Anime, 3D Render), and motion controls.
- Created a custom useVideoGeneration hook managing the full generation lifecycle — polling intervals, error states, and multi-mode state management.
- Delivered full auth flows (login, registration, forgot password) and a project-history dashboard with search, filtering, and video download functionality.
- Stack: Next.js 16, React 19, TypeScript 5, Tailwind CSS 4, Lucide React, Animate.css.

MediaVeed — UI/UX Overhaul

- Rescued a failing pre-launch product by completely redesigning the UI/UX of a React + Vite + Laravel video processing application under a tight deadline.
- Replaced slider-based navigation with a professional multi-dropdown system featuring active state management and WCAG 2.1-compliant 44px touch targets.
- Resolved critical z-index stacking issues, implemented auto-hiding mobile navbar, and optimised performance with GPU-accelerated CSS animations.
- Delivered 30+ commits over 3 weeks with zero breaking changes. Stack: React 19, Vite, Bootstrap 5.3, React Bootstrap, Lucide React.

Full-Stack Developer · Freelance

Jan 2024 – Present | Remote & On-Site

Techmykel — Referral & Reward Management System (Full-Stack, 2025)

- Built a full-stack referral-reward platform for a phone-repair business where existing customers refer new ones and earn redeemable rewards (cash, airtime, or data), with separate Admin and Referrer interfaces.
- Modeled the domain in PostgreSQL (Drizzle ORM on Neon) around strict referral and redemption state machines — enforcing referral uniqueness (each phone referrable once, ever) with a unique constraint and a single active redemption per referral with a partial unique index.
- Implemented phone-based authentication with SMS OTP verification (hashed one-time codes, 10-minute expiry, attempt limits) behind a pluggable SMS provider — Twilio in production, console in development.
- Secured the app with database-backed sessions (jose-signed cookies) and a three-tier authorization layer guarding role-scoped Admin and Referrer route groups.

- ▶ Built an append-only, immutable audit log recording every state transition with actor and before/after states; each user's status history is derived from it.
- ▶ Stack: Next.js 16 (App Router, Server Actions), React 19, TypeScript 5, Drizzle ORM, Neon Postgres, Tailwind CSS 4, jose, Zod, Twilio.

Joesy Housing Estate Website (2024)

- ▶ Developed a multi-page real estate website (React 19, React Router, Tailwind CSS 4, Vite, Framer Motion) with smooth page transitions, animated UI, and a custom session-based typewriter welcome effect.
- ▶ Built a 10-category services showcase, Google Maps API integration for office location, and a Formspreet contact form with validation and async feedback.
- ▶ Implemented responsive hamburger navigation with dropdown menus, active state management, and delayed close on hover.

Additional projects: responsive landing pages and marketing sites for small businesses, and a React E-Learning platform with sign-in / sign-up and course listings.

Web Developer Intern · I.D.E.A.L

Aug 2022 – Sep 2023 | Asaba, Delta State, Nigeria

- ▶ Developed and maintained web applications using HTML5, CSS3, JavaScript, and React across multiple client projects.
- ▶ Integrated RESTful APIs with robust error handling, loading states, and dynamic data rendering.
- ▶ Implemented WCAG-compliant accessibility features and participated in code reviews to improve maintainability and performance.

TECHNICAL SKILLS

Frontend	React 19 · Next.js 14/16 · TypeScript · JavaScript ES6+ · React Native · Tailwind CSS · Framer Motion · shadcn/ui · Bootstrap
State & Data	TanStack Query · Zustand · Redux · Context API · Recharts
Backend	Python · Node.js · PostgreSQL · Drizzle ORM · Neon · RESTful APIs · NextAuth v4 · Appwrite · Vercel Serverless
Auth / Sec.	RBAC · bcrypt · JWT / Sessions · jose · Zod · Middleware Guards · Input Validation
DevOps	GCP Cloud Run · Vercel · Netlify · Render · CI/CD Basics · Expo
Tooling	Git / GitHub · VS Code · Vite · npm / Yarn · Postman · Jest · React Testing Library
Integrations	Google Maps API · CoinGecko API · Resend API · Vercel Blob · ethers.js · WalletConnect · Twilio · Formspreet

EDUCATION

Bachelor of Science in Computer Science

Ebonyi State University, Ebonyi State, Nigeria · 2023
